

A – Tribal Elder's Story

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

“Echo, tkú, that means ‘tule.’ There was a big Indian Camp there on the north side of the river, and the main reason they were there is because of the tules, ’cause there was a lot of them. Echo was the place of the first Indian Agency. The Indians used to camp there at the agency. Even before the agency, the big Indian camp was there.”

Armand Minthorn,
Tribal Elder and Longhouse Leader

B – Tules and Dogbane

Instructions:

1. Carefully observe the materials (front and back of the page)
2. On page 9 of your Reflection Booklet:
 - Draw and describe what you observe
 - Write down *how* you think these materials were used
 - Write down *who* you think might have used them

tkú

tules, hardstem bulrushes

Schoenoplectus acutus

Left: photograph of
dogbane plant with
white “urn-shaped”
blossoms

Right: photograph
of dogbane plant
with characteristic
long, thin seedpods

tax^wis

common dogbane, indian hemp

Apocynum cannabinum

C – Diary Entry

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

Excerpt from John Lawrence Johnson's Diary

August 5, 1851

Started early and drove to the crossing of the (Umatilla) river, [...] Here we met an old “galoot” by the name of Jackson who was living with an [Indian woman]. He had been to the Dalles and had bought a dress pattern for his wife and wanted the girls to make it for her. So sister Mary and Sarah sat down in the tent and made the dress. Our company that we had traveled with most of the time for three months left us here. We met a man from Oregon, who had a contract to put up a building for an Indian Agency, he wanted to hire a few men to help him raise the building as he had hewed out the frame from green cottonwood, and they had twisted and curled up so, it was quite a job to put the frame together, but finally Harve Green and Mr. Williams and I agreed to stop 2 or 3 days and help raise the building. Father said we would meet at the Deschutes River...

We went to work on the house, it was two stories high, we put the bents together on the foundation. The boss had some goods to trade to the Indians, he hired 5 to help raise, we got the first bent up and braced. The Indians went back, sat down and when ready to raise the second bent refused to help – too tired. The boss had to make a new treaty, give each a new shirt, tobacco, coffee, sugar and some of everything he had in the store, so on with each bent a new treaty. As it was framed in 4 bents we got it up by sundown and was ready to resume our journey, with orders on Dr. Dart at Milwaukee for 3 days work at \$3 per day...

C – Diary Entry

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

D – Fabric and Buttons

Instructions:

1. Carefully observe these items
2. On page 9 of your Reflection Booklet:
 - Draw and describe what you observe
 - Write down *how* you think these items were used
 - Write down *who* you think might have used them

E – Wood Samples

Instructions:

1. Carefully observe these two pieces of wood
2. On page 9 of your Reflection Booklet, draw and describe what you observe
3. Read the attached information about ṡpṡíṡ and qalámqalam
4. Using what you learned about these trees, identify which species each wood sample is from
5. On page 9 of your Reflection Booklet, write down:
 - the species next to your drawing of each sample
 - advantages and disadvantages of each type of wood as a building material → think about...
 - the physical characteristics of the wood
 - how much work it would take to prepare the wood
 - different kinds of structures you could build with it

black cottonwood

Populus trichocarpa

May 6, 2007 © Keir Morse, Courtesy of OregonFlora

December 19, 2023 © Gabriel E. Campbell, Courtesy of OregonFlora

June 6, 2023 © Gabriel E. Campbell, Courtesy of OregonFlora

Black cottonwood is the largest American poplar and the largest hardwood tree in western North America. They are also sometimes called balsam poplar trees. These trees commonly grow along streams, in riverbeds, floodplains, or in wetland areas. You're probably most familiar with cottonwood seeds, which are white and fluffy.

This species of tree provides food and cover for a variety of wildlife including deer, elk, and beaver. The wood fibers are short and fine, making these trees particularly useful in production of wood pulp products such as paper and cardboard.

The disinfectant properties of the tree's resin can be used medicinally to treat sore throats, coughs, lung pain, and rheumatism. The inner bark can also be made into a natural soap.

qalámqalam

lodgepole pine

Pinus contorta

June 14, 2023 © Gabriel E. Campbell, Courtesy of OregonFlora

July 26, 2008 © Bruce N. Newhouse, Courtesy of OregonFlora

A tall, straight-trunked, narrow-crowned pine that is native to higher elevations in the Rocky Mountains and Cascade-Sierra ranges. When it grows in dense stands it forms clean, gradually tapering shafts which are used by Indigenous peoples for structures such as longhouses, tipis, and lodges, hence the name “lodgepole pine.”

This species is also used for windbreaks in conservation applications and provides a source of food for a variety of birds and squirrels, as well as porcupine. Medicinally, parts of this plant can be used to treat a variety of ailments, including rheumatism, colds, and sore throats. The inner bark can also be used as an emergency food source for both horses and humans.

F – Letter

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

*Utila Station
Sept 17th 1851*

Hon. Dr. Dart,

Sir, on my arrival here I went to Fort Walla Walla to procure my interpreter, but I could not persuade Baptiste to engage as such; he says he never gave any encouragement to that effect. [...] I have temporarily an Indian called Geary who has served me. [...] The Walla Walla, Nez Perces and Cayuse Chiefs have all been to see me and I believe they went away much gratified [...] – my first business is to make terms with the Indians and to do this I shall succeed – I have no doubt. [...] the [letter] bearer stands impatiently over me waiting, so I write in much confusion. [...]

*Your Obedient Serv't,
Elias Wampole*

N.B. the building cannot be finished without one more keg of 10 penny nails, will you have them sent to the Dalles immediately.

F – Letter

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

G – Nails

Instructions:

1. Carefully observe the items, pay close attention to size and shape
2. On page 9 of your Reflection Booklet, draw and describe what you observe
3. Read the information below about nails and penny sizing
4. Use the Nail Sizing Chart on the back of this page to figure out the penny size of each replica nail
5. On page 9 of your Reflection Booklet, write down:
 - the penny size next to a quick sketch of every nail
 - what you think each nail was used for based on its shape and size (think about the different shapes and sizes of modern nails)

Nails in the United States are identified or named by their length/size, which is given in “**penny size**.” Penny sizes are based on the cost of 100 nails in England during the 15th century.

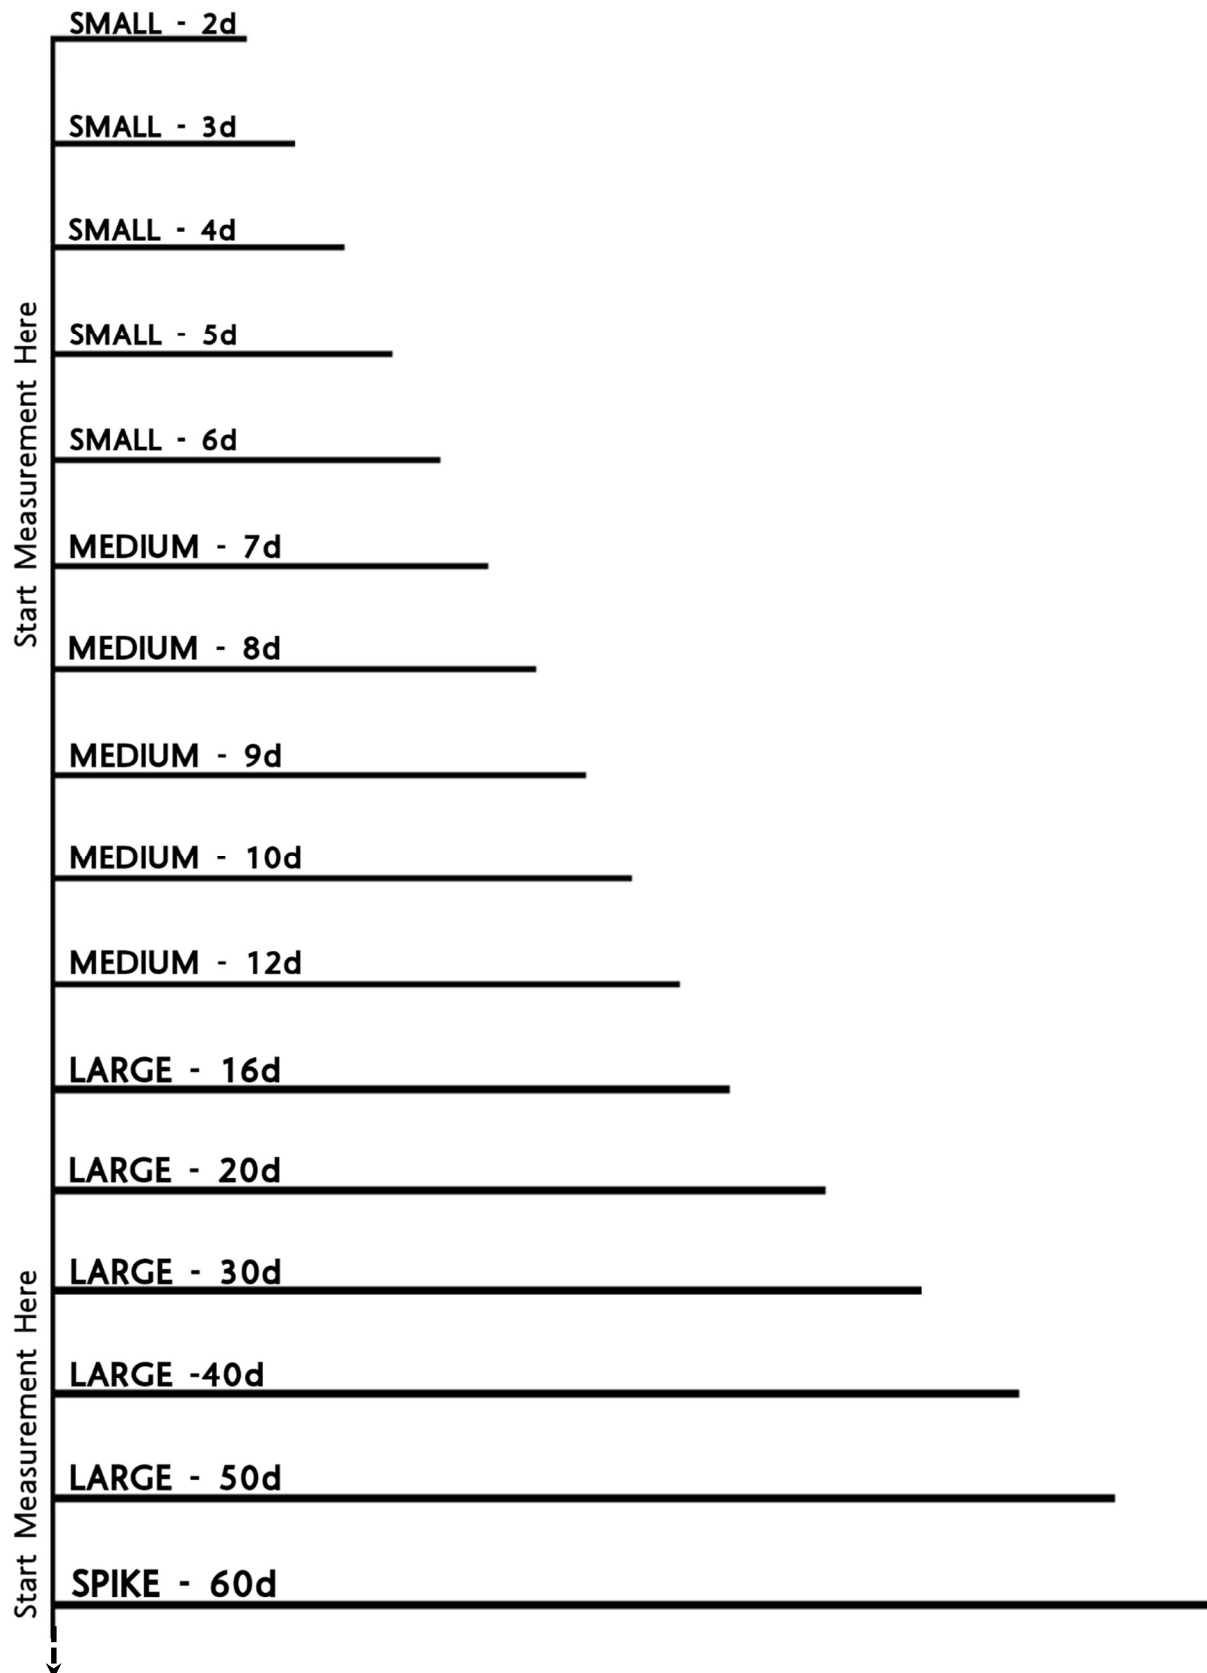

So, for example, 100 nails that each measured around 2-inches long would have cost 6 pennies back then. Today, we still call nails that size *6-penny* or *6d* nails.

The symbol *d* is an abbreviation for a denarius, which was a Roman coin very similar to a penny (shown left).

Did you know that Roman Empire at one time extended all the way to Britain? That’s why the British government used the *d* abbreviation for pence or pennies to avoid confusion with *Pounds* (which are the British version of dollars).

Nail Sizing Chart

H – Ceramic Fragments [Scotch tape may be needed]

Instructions:

1. Carefully observe the fragments → watch out for jagged edges!
2. On page 9 of your Reflection Booklet:
 - Draw and describe the fragments
 - Write down your best guess of what the container might be based on what you observe
4. Next, try to put the pieces back together – think about it like a 3D jigsaw puzzle (ask for a few small pieces of tape if you need some help holding pieces together)
5. Now that you have a clearer idea of the shape and size of the vessel, are you able to make a different guess about what it was used for?
Hint: How would you write if there was no ink inside the pen you were using?
6. On page 9, write down your final guess of what you think this reassembled artifact was used for in the past

I – Diary Entry

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

Excerpt from Virgil Pringle's Diary

September 25, 1853

This day we traveled 17 miles and again crossed the Umatilla River which brought us to the Indian Agency where Mr. Wampole is stationed and where there is a large frame house which at this time is unfinished within, though the outside presents a fair appearance as it was painted as white as snow. Here also an opportunity to procure flour. Mr. Wampole asked \$18 per hundred pounds [of flour]; sugar is 37½ cents; coffee, ditto.

I – Diary Entry

Instructions:

1. Carefully read the words below
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described

Here also [is] an opportunity to procure flour. Mr. Wampole asked \$18 per hundred pounds [of flour]; sugar is 37½ cents; coffee, ditto.

J – Foodstuffs

Instructions:

1. Carefully observe these samples of historical grocery staples
2. On page 9 of your Reflection Booklet:
 - Draw and describe what you observe about each of them
 - Identify each sample based on your knowledge of modern grocery items
 - Write down your answers to each of the following questions...
 - Who do you think would have used these in their daily cooking?
 - How do these look the same as OR different from what your family usually buys at the store?
 - Why do you think these items were important to people at that time?

K – Personal Item

Instructions:

1. Carefully observe this artifact replica
(you can gently take it out of the box – it is breakable so handle with care)
2. On page 9 of your Reflection Booklet:
 - Draw and describe what you observe
 - Write down *how* you think this item was used
 - Write down *who* you think might have used it
 - Write down *why* you think these things

L – Newspaper Report

Instructions:

1. Carefully read the report on the back of this page
2. On page 8 of your Reflection Booklet, write down:
 - the people and places mentioned
 - what people may have been doing and how they did it
 - any items or non-human beings described
3. Look at what some of these items would have cost in modern times. Does anything surprise you at how expensive or cheap it would have been?
 - If you have time, you can ask about looking up modern prices for these items on the internet to compare.
4. Draw a circle around any of the items that you wrote down on page 8 that have surprising prices

6 NEW-YORK DAILY TRIBUNE, WEDNESDAY, JUNE 4, 1851.

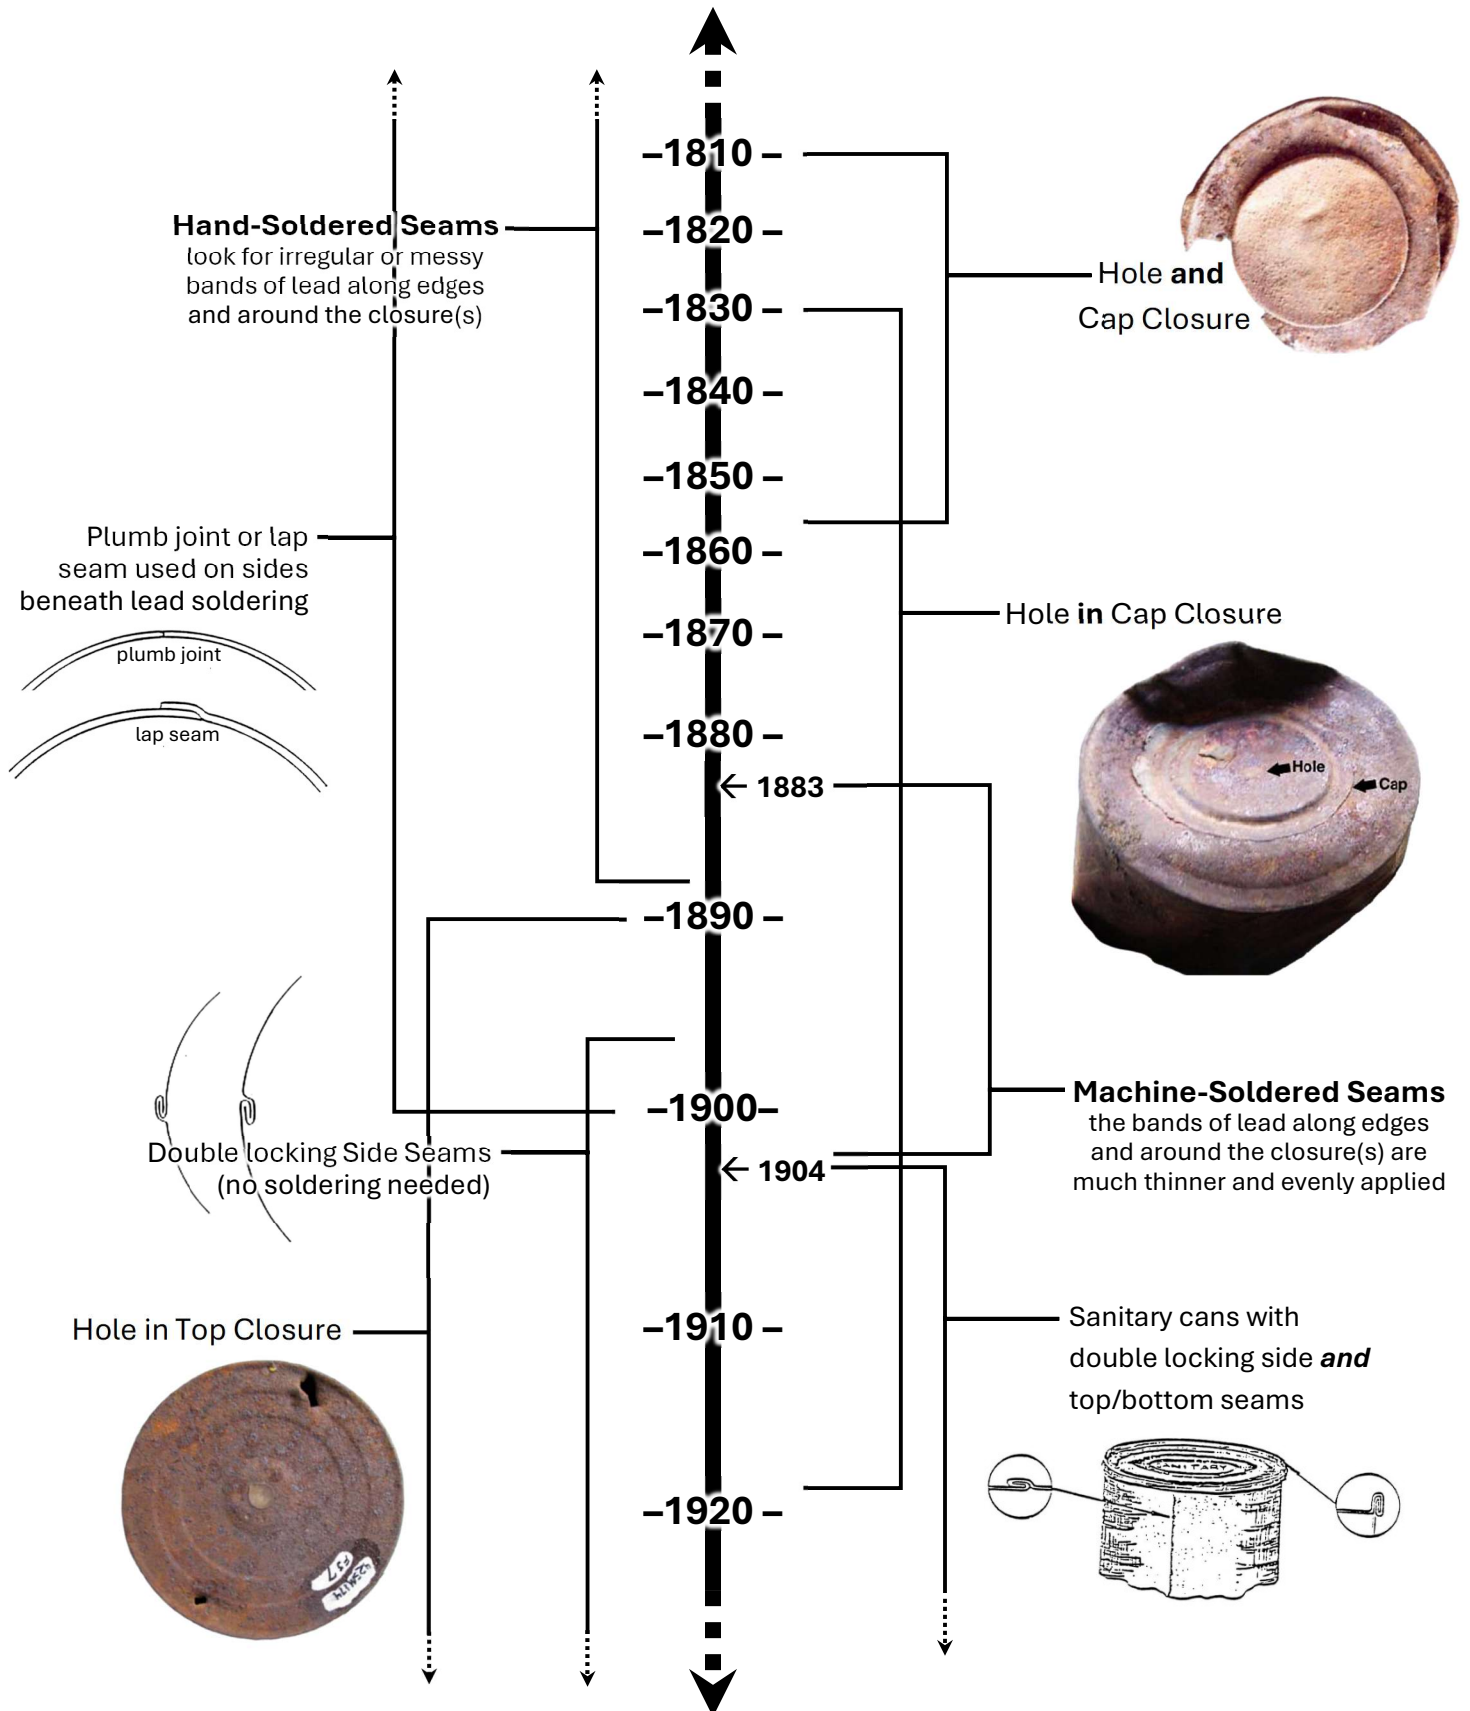

Wholesale Prices Current. From the San Francisco Herald, May 1.

Items	Unit of Sale	Price in 1851	Price with inflation
<u>PRESERVED MEATS ETC. [canned]</u>			
mutton and beef	per pound	3¢ -- 7¢	\$1.30 -- \$3.00
oysters, quarts	per dozen	\$7 -- \$9	\$25 -- \$32 per quart
lobsters		5¢ -- 6¢	\$2.16 -- \$2.59
vegetables	per dozen	3¢ -- 5½¢	\$1.30 -- \$2.50
<u>PAINTS AND OILS.</u>			
white, lead		7¢ -- 8¢	\$3.00 -- \$3.46
red, lead		9¢ -- 10¢	\$3.89 -- \$4.32
whiting		2¢	86¢
chalk, white		4¢	\$1.73
chalk, red		10¢	\$4.32
<u>TOBACCO.</u>			
Kentucky leaf		30¢ -- 35¢	\$12.97 -- \$15.14
Spanish leaf		40¢	\$17.30
<u>DRY GOODS.</u>			
blankets, white	per pair	\$2 -- \$5	\$86 -- \$216
blankets, colored	per pair	\$3.50 -- \$5	\$151 -- \$216
cloth	per yard	\$3 -- \$8	\$129 -- \$346
cotton duck [canvas]	per yard	33¢ -- 35¢	\$14.27 -- \$15.14
<u>STATIONERY.</u>			
paper, superfine	per ream	\$3 -- \$5	\$129 -- \$216
paper, ruled and lined	per ream	\$4.50 -- \$5	\$194 -- \$216
<u>GROCERIES.</u>			
sugar, light		5½¢ -- 6¢	\$2.50 -- \$2.59
sugar, brown		3¢ -- 5¢	\$1.30 -- \$2.16
sugar, loaf		11¢ -- 12¢	\$4.76 -- \$5.19
coffee	per pound	13¢ -- 15¢	\$5.62 -- \$6.49
<u>BREADSTUFFS.</u>			
flour	per 200-lb sack	\$8.50 -- \$9	\$1.83 per pound
corn meal	per barrel	\$7	\$302

For example, a package of lined paper cost \$4.50 in 1851.
That would be the same as \$194 in today's money!

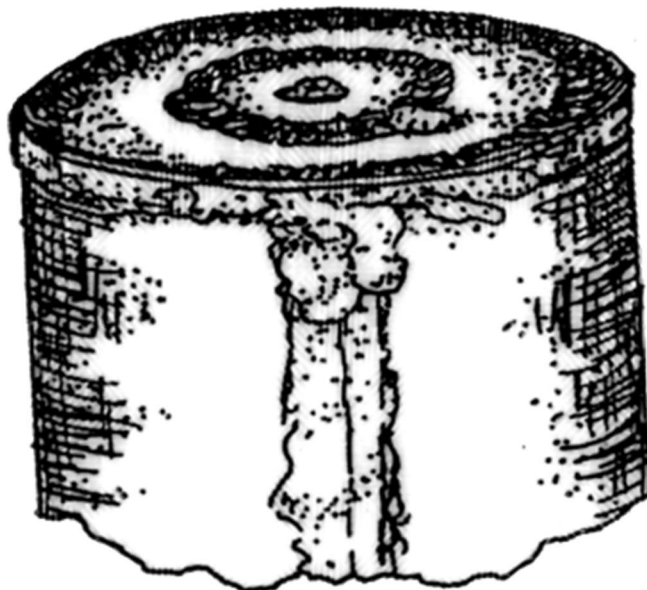

Timeline of Can Manufacturing Technologies

M – Can

The artifact in this photograph is part of the Jim Rock Can Collection in the Southern Oregon University Laboratory of Anthropology and made available by Southern Oregon University Hannon Library.

Artifact illustration by Jim Rock

M – Can

Instructions:

1. Carefully observe the images of the artifact shown on the other side of this page
2. On page 9 of your Reflection Booklet, draw and describe what you observe
3. Use the attached “Timeline of Can Manufacturing Technologies” to figure out when the pictured artifact was most likely made – write down the year range on page 9
4. Based on what you know about this era, brainstorm a list of what might have been preserved and sold in a can like this at that time – write your list down on page 9

N – Sahaptian Sentence

[Internet Access Needed]

Instructions:

1. Carefully read the sentence below
2. Go to <https://tule-place-teachings.github.io/glossary> or scan this QR code: 
3. Use the Ičiškíin Sínwit section of the glossary to find as many words as you can from the sentence – listen to the pronunciations and try to say the words out loud
4. On page 8 of your Reflection Booklet, write down each of the Sahaptian words that you found and their English translations
5. Use context clues to guess what the whole sentence might say – write down your guess on page 8

Tkúpa iwačá Naama úyit tmiyutpamá níit.
